

TWITCH DESIGN FOR ALEA

Customer: Jörg Roth/Alea, Saltatio Mortis, 2023

Jörg Roth aka Alea, frontman of the band Saltatio Mortis, is also a streamer on Twitch. There I help him with the visual design of his channel. In the beginning, I created emotes for his channel that viewers can use in the chat. Then came the complete revision of the stream graphics*. At a later stage, I took on further tasks and edited smaller, shorter videos for social media from the streams. My tasks also included streaming plans for Instagram and special graphics for special events such as his anniversary. For his annual recap, I created a video from lots of funny clips in the first year and a separate website in the second year.

When working with Alea, I made sure that his Twitch channel design also matched his band design, as this channel is also the band's official channel. I was provided with graphics for this. As he is a public figure, I always have to make sure to present him in a good light.

Further down the line, I created Instagram stickers for the band with their logo and band members.

*These are very similar to UI elements on websites or in games. These can be backgrounds, small fields for dynamic text, or even entire animations.

PROGRAMS USED

Photoshop
DaVinci Resolve (Video Editing)
Moho 12 (2D Animation)
After Effects (2D Animation)
OBS (Streaming Software)

TWITCH EMOTES

Choose your mood

Das Kämpferherz

TWITCH STARTSCREEN

Old

Concept

Final Design

For the concept, I tried to recreate the background that the band uses on social media. In the final design, the logo moves like a heartbeat.

TWITCH OVERLAY

Old
Design

Concept

Final
Design

New main overlay including different separated fields, that can be reused at any position.

TWITCH OVERLAY

Fields and frames for the stream, Instagram Story templates and designs for special occasions.

CHILDREN'S GAME IN SPACE

Client: gradient0, 2023

The client was commissioned to realize a children's game. I created the 2D graphics and animations. This included characters, backgrounds, tiles and UI elements - everything should be in a comic style. The game is used in Austrian schools.

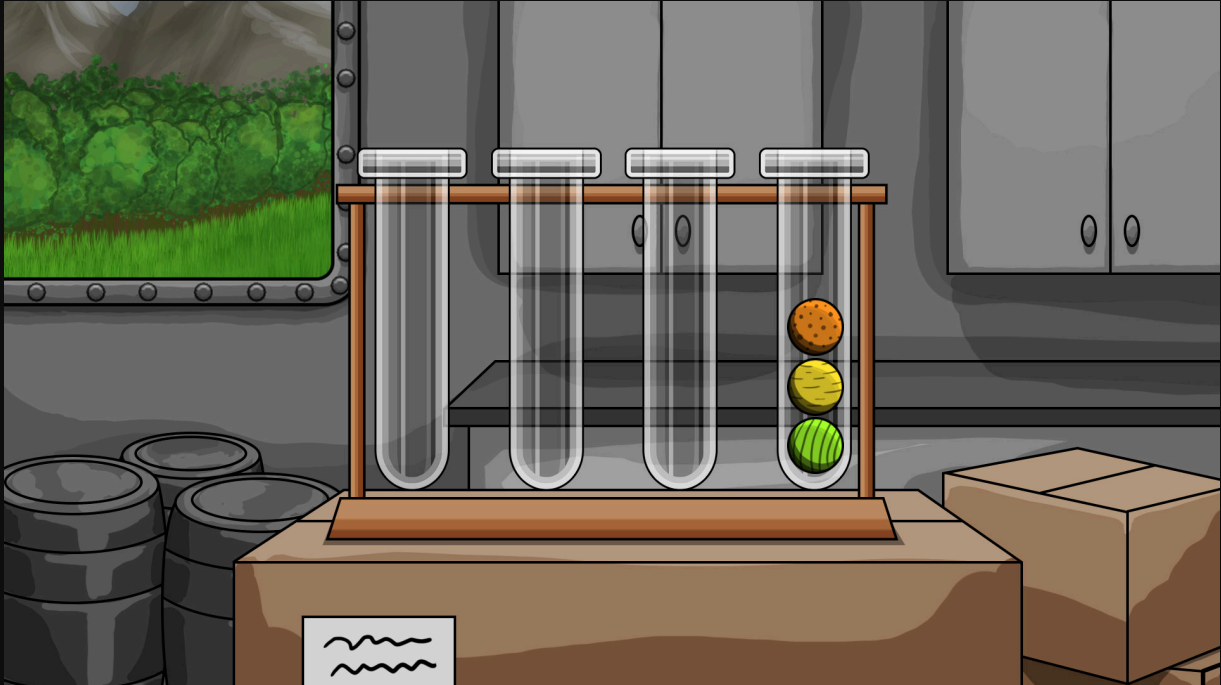

PROGRAMS USED

Photoshop
Moho 12 (2D Animation)

BACKGROUND IMAGES

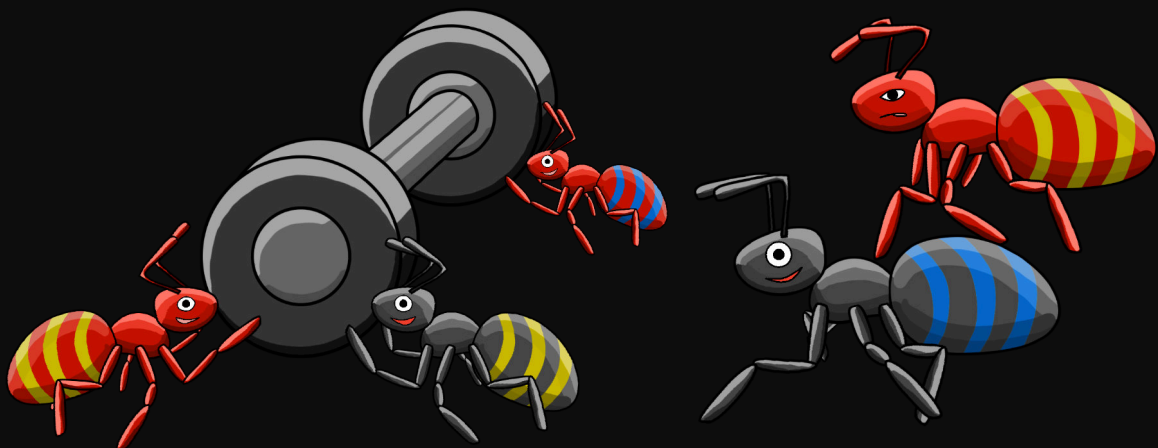

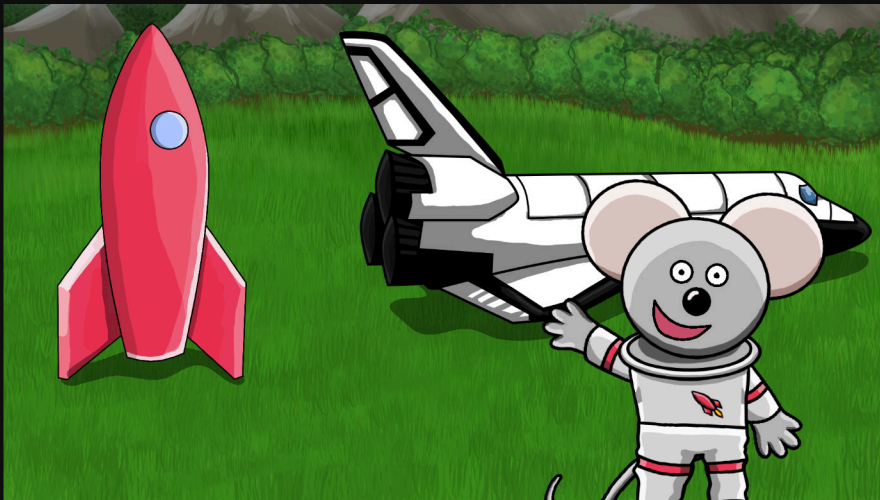

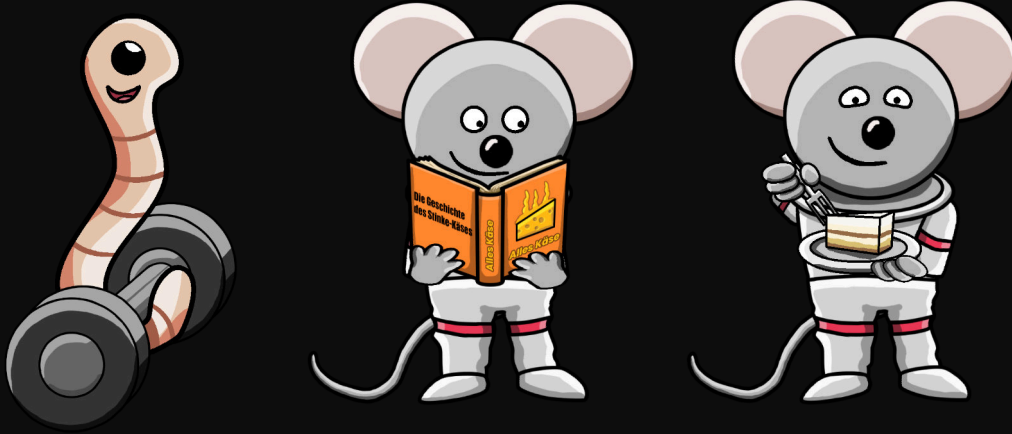

FILM POSTER

During the game, the kid has to complete some simple tasks. Later it can decide, which film should be watched.

CHARACTERS & ANIMATIONS

Created comic characters including simple animations and variants. The ants are very emotional and have different facial expressions.
